

BICYCLE RACK REX

BICYCLE RACK REX

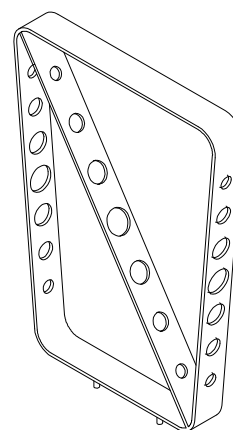

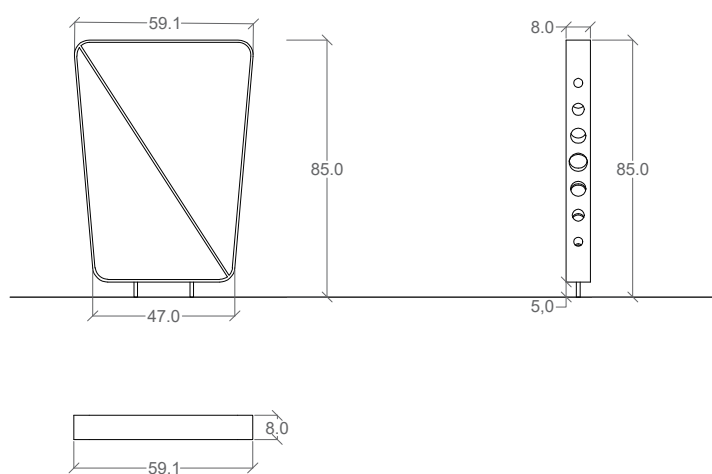

The REX model is a bicycle rack with a distinctive design and rectangular shape, created to integrate elegantly and effectively into contemporary urban environments.

Made entirely of metal, its perforated profile features multiple holes along its entire surface, facilitating the use of locks or chains in different positions. This feature allows for convenient and efficient securing of both the frame and wheels.

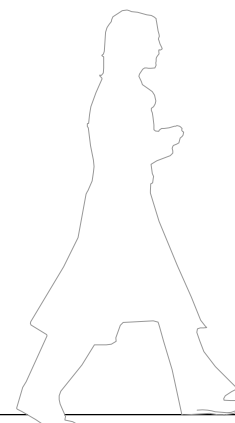

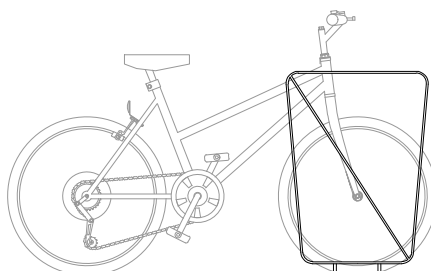

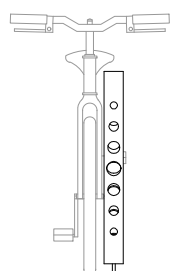

REX rests on two minimal support points, which slightly elevates the structure from the ground and creates a sense of lightness and visual levitation, breaking with the usual image of conventional bike racks and adding aesthetic value to the urban landscape.

Technical specifications

Measurements in centimeters (cm)

Available materials and finishes

A. Zinc-plated steel

Made of 4 mm thick galvanized steel sheet metal.

○ White

● Metallic gray

*Other colors upon request

B. Stainless steel

Made of 3 mm thick stainless steel sheet metal.

● Metallic gray
