

BICYCLE RACK WALL

BICYCLE RACK WALL

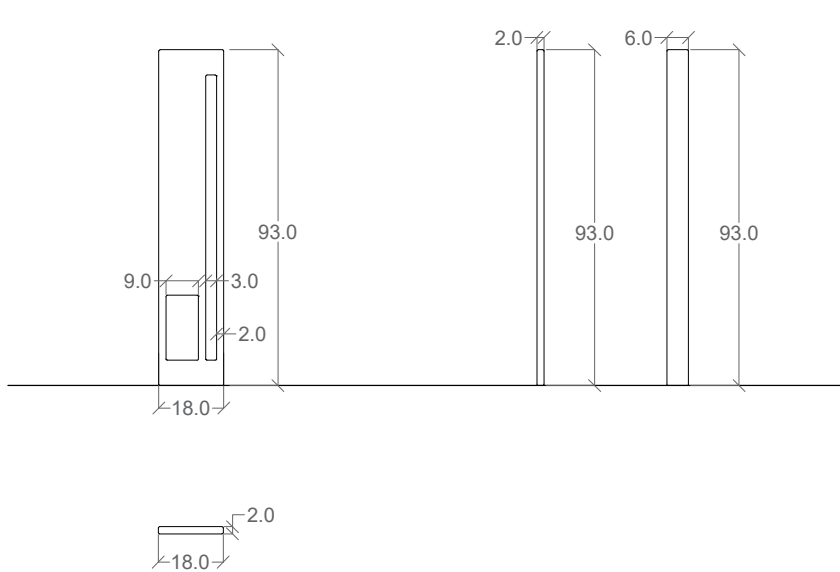

WALL is a rectangular bike rack designed for security and ease of use. It features two large openings: a vertical one for securing the frame or wheel, and a lower one designed for inserting the pedal or securing various points of the bike, making it easier to use locks and improving protection against theft.

It's available in three materials, adapting to different urban contexts: steel, for an elegant and contemporary look; Corten steel, which provides a timeless and warm aesthetic; and architectural concrete, which guarantees a robust and long-lasting presence in high-traffic spaces.

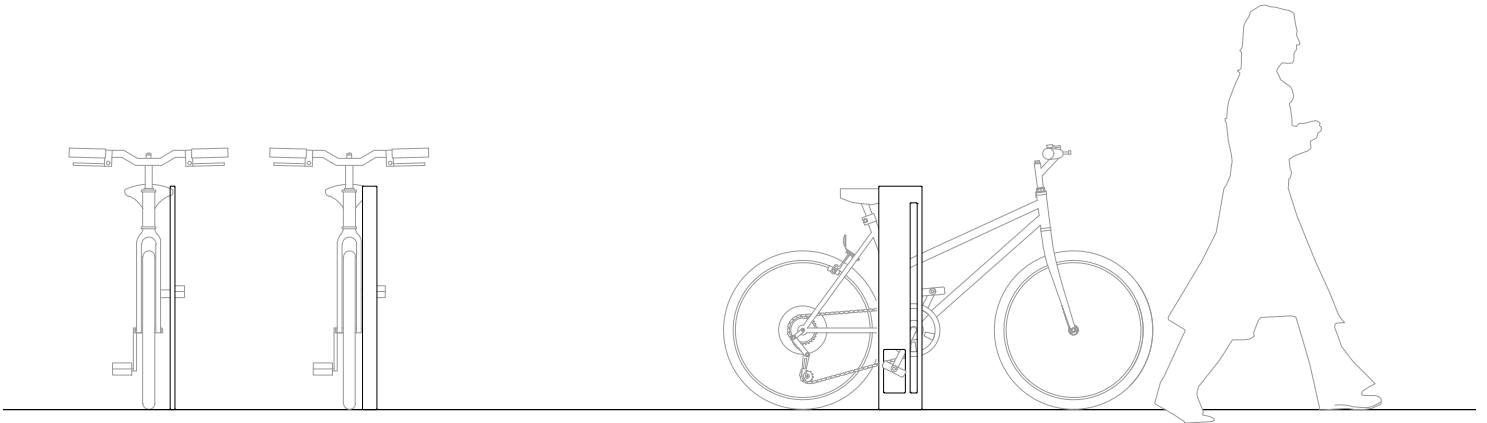

WALL is a versatile and representative piece of urban furniture, combining durability and a strong visual identity.

Technical specifications

Measurements in centimeters (cm)
