

SERIE CIRC

SERIE CIRC

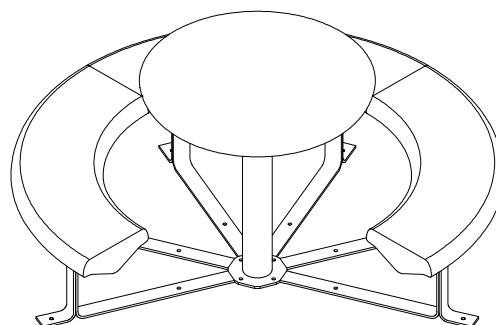

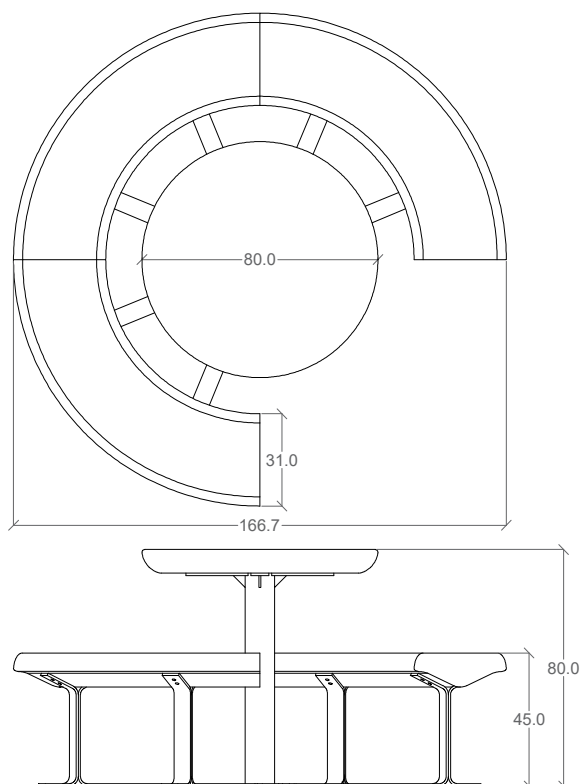

A modular set designed from quarter-circle seating modules, allowing for multiple configurations depending on the environment or intended use, from semicircular compositions to open layouts that encourage interaction.

Designed specifically for people with reduced mobility, its design includes appropriate heights, distances, and access points that facilitate access to and independent use of the table and seating, promoting an inclusive and comfortable experience.

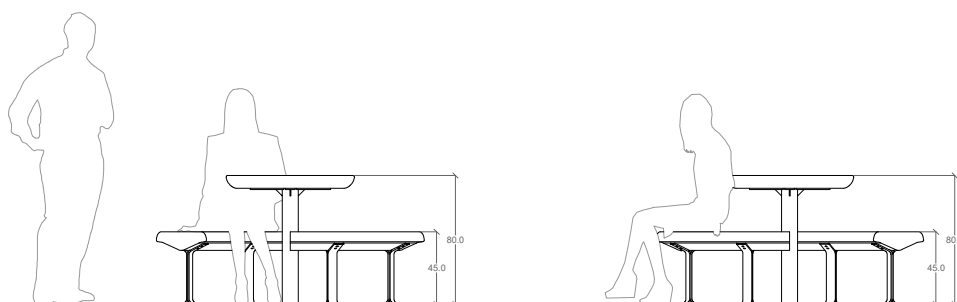

Made with architectural concrete for the seat and table elements, the set guarantees strength, durability, and a sober, contemporary aesthetic. The structure is completed with metal legs, which elevate the pieces from the floor and create a sense of levitation and visual lightness, in contrast to the solidity of the concrete.

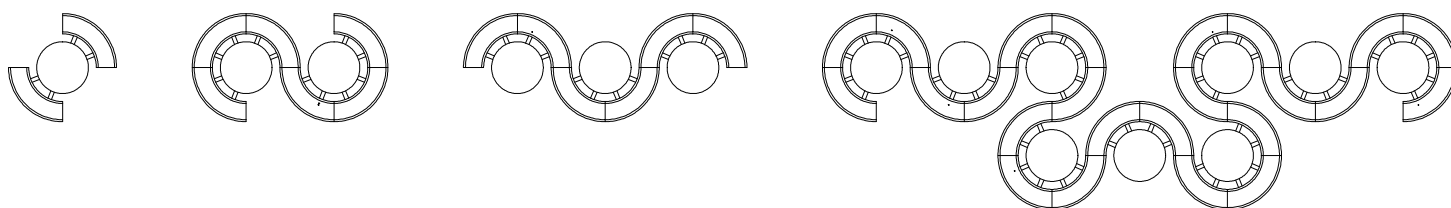

Technical specifications

Measurements in centimeters (cm)

Possible combinations

Available materials and finishes

A. Concrete

Piece made of concrete, reinforced with steel rods, which gives it great rigidity.

- ☐ White
- ☐ Grey
- ☐ Black

Fixation

A. Concrete

Fixing using stainless steel threaded rods or expansion screws in compact pavements.
