

PERGOLA GMQ

PERGOLA GMQ

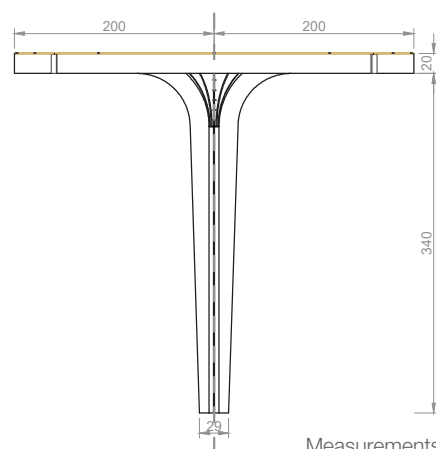

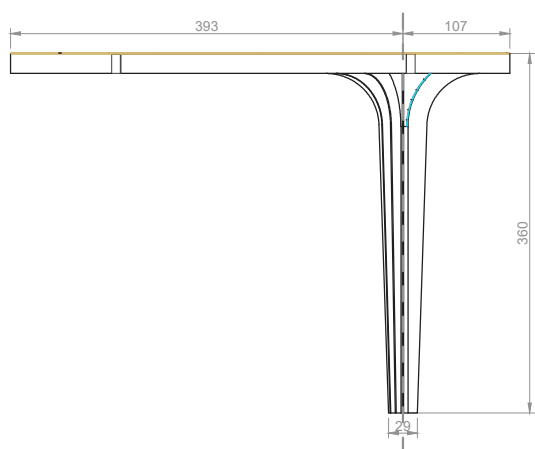

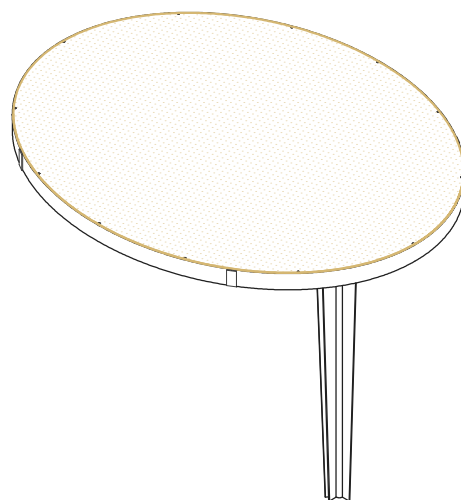

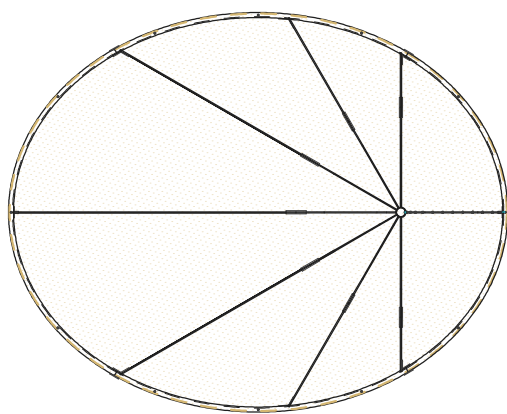

A contemporary pergola with a spherical geometry that combines design, technology, and functionality to create a unique and attractive space in public or private settings. Measuring 5 and 4 m in diameter, its center is decentralized, significantly expanding the usable area inside, promoting functional use and spatial perception.

The structure is composed primarily of two materials: lacquered iron, treated with anti-corrosion paint, ensuring its resistance in aggressive or high-humidity outdoor environments, and stretched canvas, which provides sun protection and visual lightness to the whole.

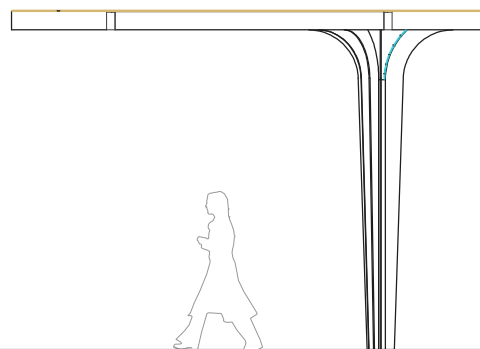

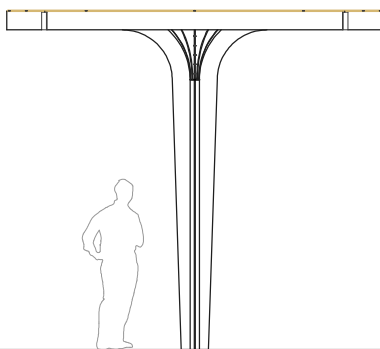

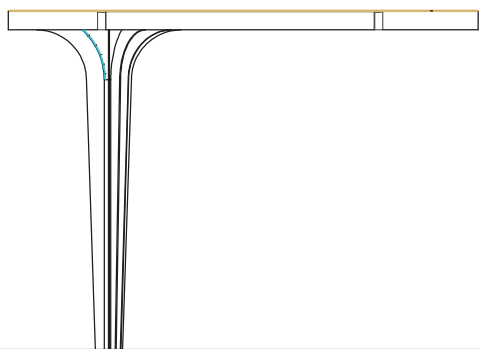

It incorporates an integrated neon lighting system, completely customizable in color, allowing its visual character to be adapted to the environment, intended use or special events.

Technical specifications

Measurements in centimetres (cm)

Available materials and finishes

A. Coverage

Textile or similar covering mesh (to be chosen by the F.M.).

B. Structure

Made with galvanized steel profiles with anti-rust protection.

● Metallic gray

Fixation

Fixing using stainless steel threaded rods or expansion screws in compact pavements.
