

BENCH STEP

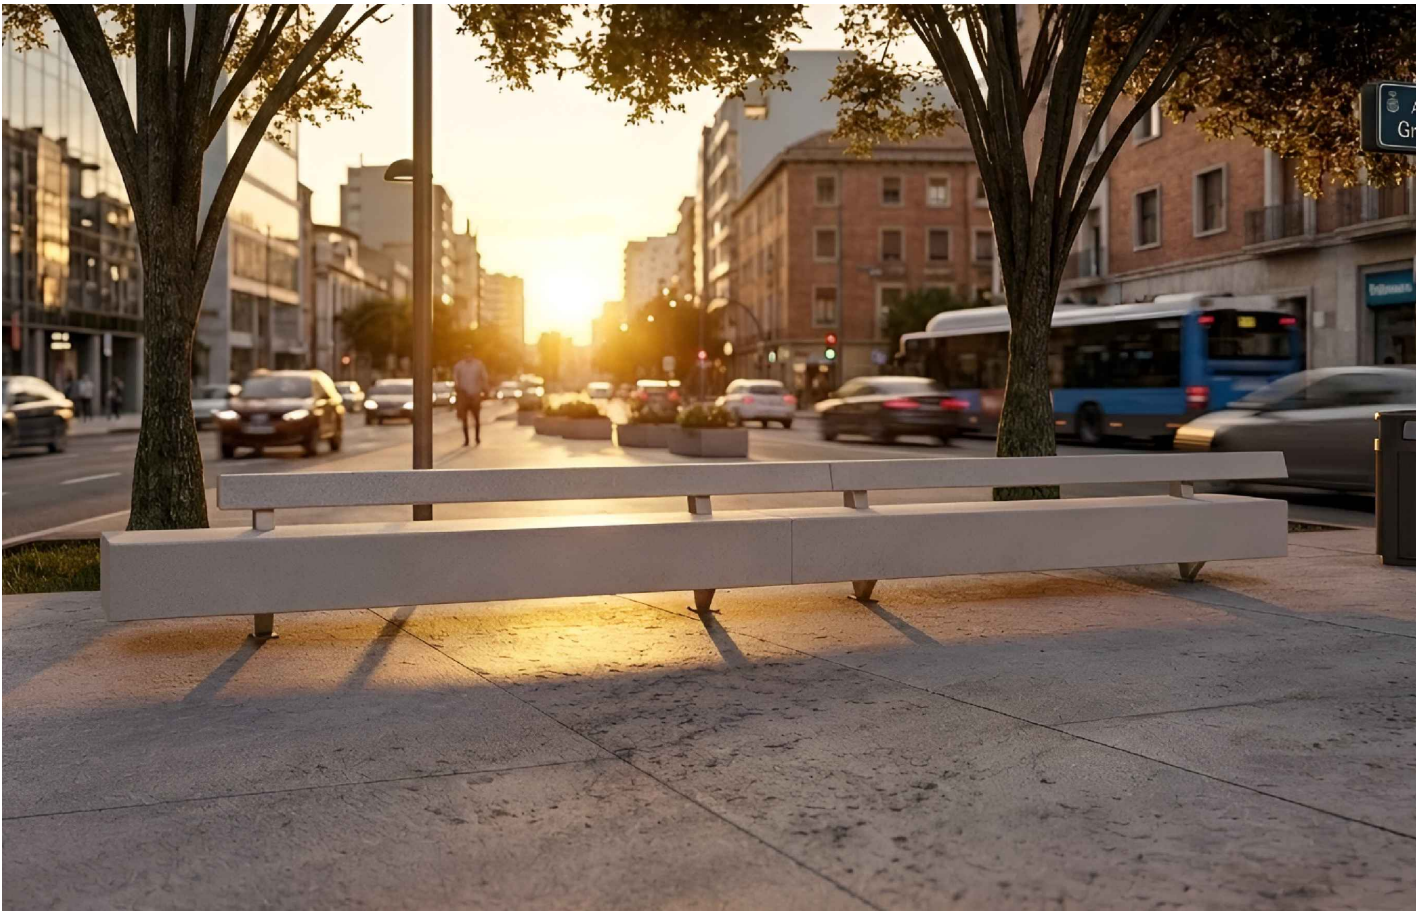

BENCH STEP

A contemporary design bench that stands out for its formal cleanliness, clean lines, and structural elegance. Made with architectural concrete and metal legs, it guarantees durability, strength, and a timeless aesthetic.

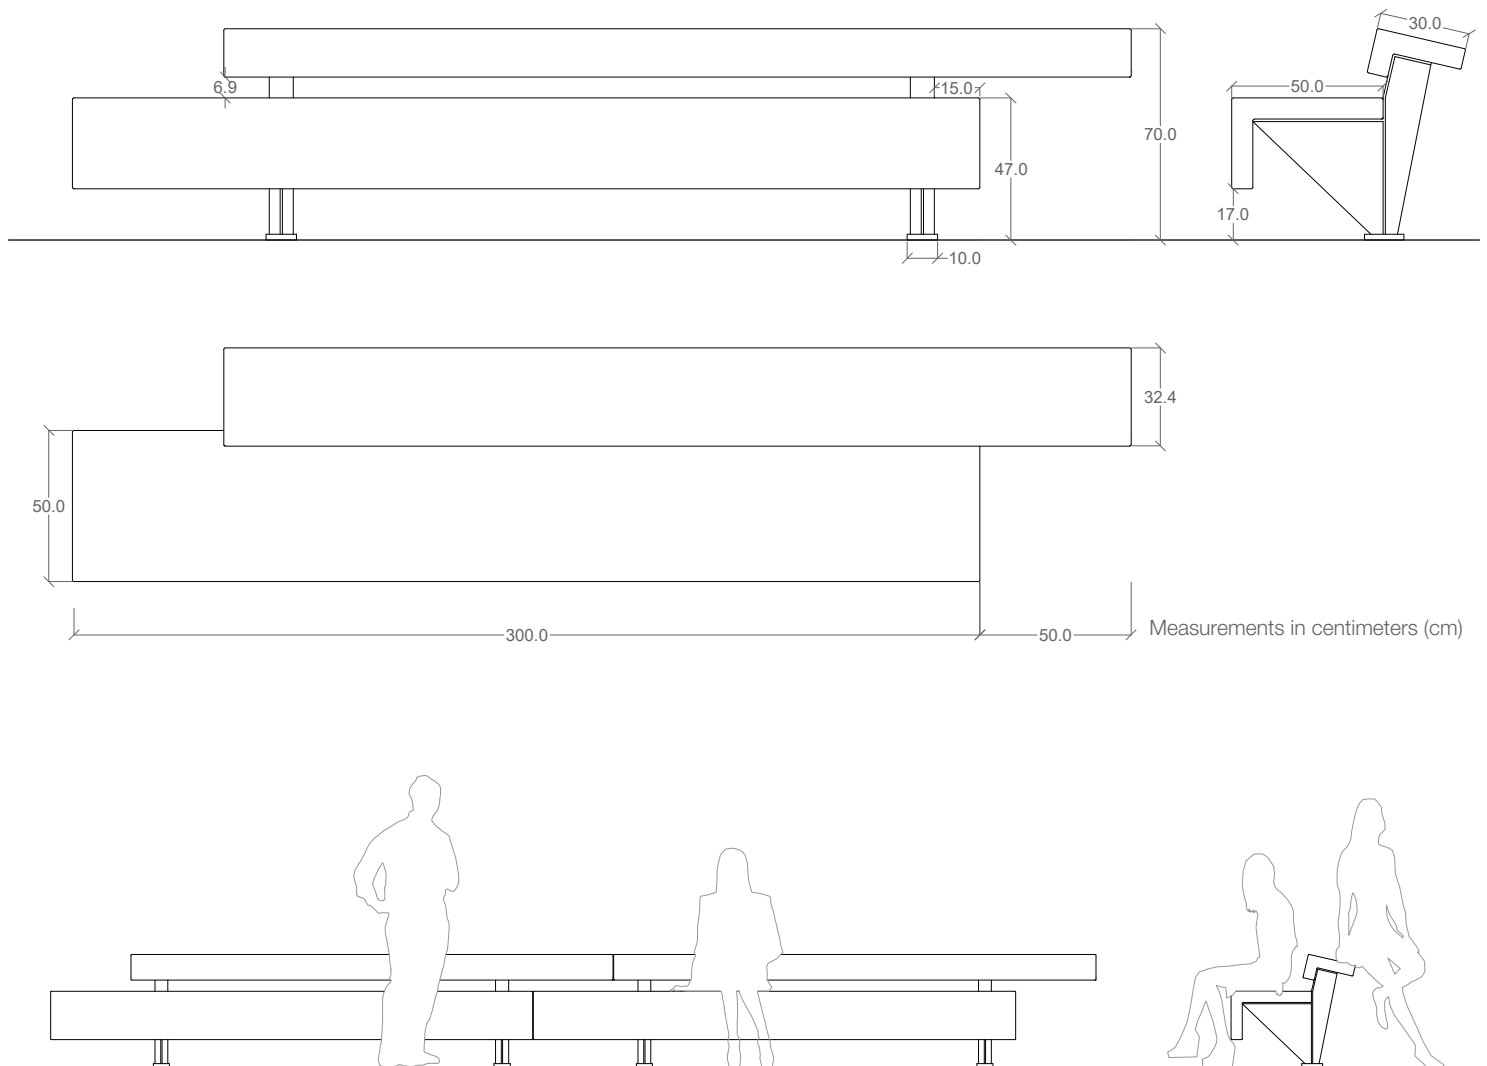

The piece is composed of two "L" shaped elements:

The seat, an inverted "L", is raised from the ground by metal legs, generating a sensation of lightness and visual cleanliness, while facilitating the maintenance of the environment, and the backrest, also in the shape of an "L", projects over the seat without touching it, creating a levitation effect that provides transparency, slenderness and a subtle visual integration with the environment.

A sober and contemporary piece, designed to integrate functionality, aesthetics, and harmony in public spaces.

Technical specifications

Available materials and finishes

A. Reinforced concrete

Piece made of concrete, reinforced with steel rods, which gives it great rigidity.

- ☐ White
- ☐ Grey
- ☐ Black

Fixation

A. Reinforced concrete

Fixing using stainless steel threaded rods or expansion screws in compact pavements.
