

BENCH WINDOW

BENCH WINDOW

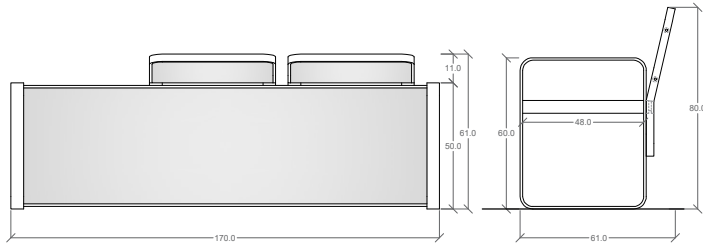

A piece of street furniture designed for interrelation scenarios in public spaces, capable of arousing emotions both in urban environments and in natural spaces. When the bench is free, it is perceived as a sculptural element.

An elegant and sober bench, with straight lines, which not only fulfils the function of a seat, but also adds aesthetic value when placed in the urban space: promenades, ports, parks, squares, roads, etc.

It is available in three versions: bench with backrest, without backrest and individual seat, giving rise to multiple compositions according to the needs demanded by the space to be provided and the user.

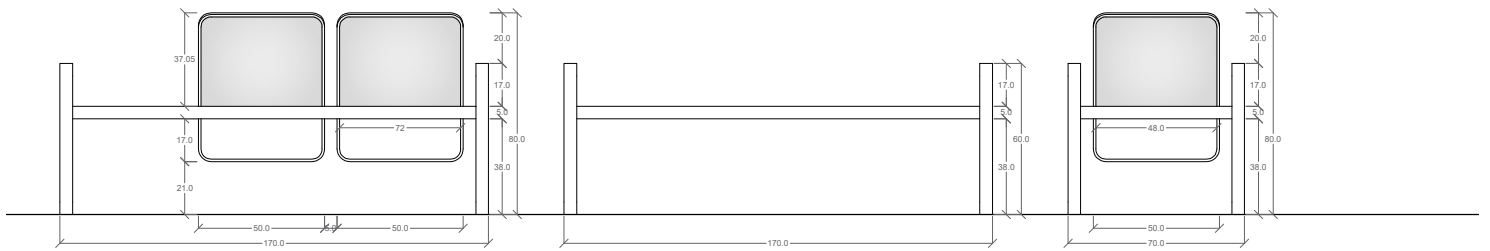

Technical specifications

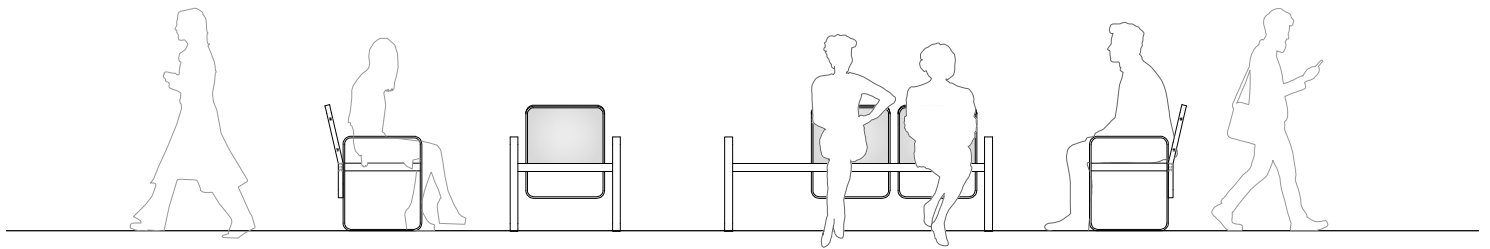

The purity of the lines and the symbiosis between straight planes of the Bench WINDOW reinforce the shine and textures characteristic of concrete.

An urban element that is resistant to use and atmospheric conditions, designed to last in a comfortable and socially shared environment.

Measurements in centimeters (cm)

Available materials and finishes

A. Natural stone

Can be made in any natural stone. We recommend to work with local or proximity stones for sustainability and easier repairability.

- ☒ Sierra Elvira
